

# Environment, Health, Safety, Quality & Community Management Software

*“Good Governance and sound information management demonstrates an organization’s commitment to transparency, accountability and social responsibility.”*

Isometrix is a web-based, software application that assists companies to achieve their sustainability goals by systematically improving on their business practices to provide critical information to those who need it, when they need it.

## Web-based Design

- Standard Internet Browser software
- Supports Microsoft SQL Server
- Rapid, cost effective deployment
- Centralized security and support

## Feature Rich

- Flexible, user-configurable design
- Single and multi-site capabilities
- Multi-language capabilities
- Search, categorize and analyze
- Prioritize and communicate
- Smart alerts and issue flagging
- Notifications and escalations
- Built-in mission-critical reports
- Templates and ad-hoc reporting
- Link to Document Management Systems (DMS)

## Third Party Product Integration

- Microsoft SharePoint™
- EQWin™
- ArcGIS™
- Other

## Large Customer Base

Over 80 sites globally:

- Resource-based Industries
- Energy and Utilities Industries
- Food, chemical and other

Structure and terminology based on the ISO14000, ISO9000 and OHSAS18000 series of international standards:

- General
- Policy
- Planning
- Implement & Operate
- Check & Correct
- Management Review
- Administration

***IsoMetrix ensures Information Management is easy, and reporting is accurate and timely!***

- Increases sharing of and real-time access to information
- Assigns responsibility and accountability to where it matters
- Engages those who are responsible for supervising and managing their business
- Identifies and escalates procedural inactions or failures to those who are ultimately responsible
- Alerts management to adverse trends and enables them to “manage by exception”
- Reduces reaction time to important issues and risks facing the organization
- Enables standardized corrective actions and documenting of improved procedures
- Speeds up and simplifies reporting
- Provides knowledge sharing and operational continuity
- Enables each site and management discipline to be configured to specific needs
- Uses a secure single-source data repository for across discipline and site reporting

## The Value:

IsoMetrix is a highly flexible and configurable web-based software application that is designed to assist you in efficiently managing and responding to your operations' Environment, Health, Safety, Quality and Community needs.

### **Significantly improves the information management for your formal Environmental Management System (EMS)...**

IsoMetrix's systematic process of capturing, searching, categorizing and analyzing information as well as assigning and prioritizing of tasks minimizes the cost of Environment, Health and Safety initiatives, while ensuring adherence to your business goals, policy and legal requirements.

### **Provides an integrated management view across related operational disciplines, and allows for prioritized actions and improvements...**

Safety, Health, Environment and Quality are some of the more common management categories typically managed by IsoMetrix, but many other areas appropriate to an organization's specific operating environment may also be integrated and prioritized.

### **Empowers users, assigns accountability and improves communication across the organization...**

IsoMetrix's Web-based technologies provide real-time access to information (to those authorized) from any computer connected to the Internet. Through IsoMetrix's powerful communications modules (task, incident, action and meeting management), instructions are easily delegated to those responsible and closed out by supervisory staff once completed.

### **Caters for the assessment, prioritization and the allocation of resources...**

Continual improvement of the Environment, Health and Safety initiatives and processes is facilitated through the "plan, do, check, act and review" cycle, and enables on-the spot entering of revised objectives by supervisory staff and capturing of improvements by those responsible.

### **Enables 'management by exception'...**

By quickly identifying and prioritizing issues, setting objectives and allocating tasks and responsibilities, allows supervisors, managers and executives to focus only on those areas that need their attention, thus freeing up their time to drive continual organizational improvement.

### **More than adequately meets the needs of users, thus reaffirming IsoMetrix's global success...**

The IsoMetrix framework is based on the structure and terminology of the ISO 14000, ISO 9000 and OHSAS 18000 series of international standards. For important decision making, it is easy to get operational data in, and to get meaningful and actionable information out.

## The Scope:

IsoMetrix's integrated philosophy, configurable design and scalability allows you to deploy only as few or as many modules as are necessary, ranging from:

- ▲ Task Management
- ▲ Meeting Management
- ▲ Permit Management
- ▲ Compliance Management
- ▲ Incident and Investigations Management
- ▲ Non-conformance Management
- ▲ Corrective Actions Management
- ▲ Stakeholder Engagement Management
- ▲ Monitoring Data Management
- ▲ Chemical Substance Management (MSDS)
- ▲ Document Management
- ▲ Audit Management
- ▲ Inspections Management
- ▲ Truly Integrated Risk Management
- ▲ Waste Management
- ▲ Manage to ISO 14000, ISO 9000 and OHSAS 18000 standards

## The Beneficial Outcomes:

- ▲ Meet corporate sustainability objectives within a legal framework
- ▲ Improve communication across your organization
- ▲ Reduce health, safety, quality and environment risk and incident costs
- ▲ Improve operational management
- ▲ Easily identify and report on legal issues to facilitate legal compliance
- ▲ Clear audit trails on system status
- ▲ Quickly evaluate and understand the status of different operational areas
- ▲ Share information and retain corporate knowledge
- ▲ Reduce data searching and reporting time
- ▲ Access information relevant to employees areas of responsibility
- ▲ Presentation of information based on roles and responsibilities
- ▲ Clear audit trails on system status
- ▲ Maximize the value of your information

## IsoMetrix's powerful reporting capabilities:

IsoMetrix provides capabilities for sorting, searching, categorizing, prioritizing, analyzing and communicating information across the organization (and even across sites). Data can be viewed the way you want it and when you want, allowing you to make informed management decisions instantly.

## Our Customers Say:

*"IsoMetrix has exceeded our expectations in the way it reports our many EH&S risk categories."*

*"IsoMetrix has given our on- and off-site staff access to the information regardless of where our sites are."*

*"IsoMetrix allows our managers to communicate clearly and delegate responsibility to those who have to carry out the work."*

*"IsoMetrix is definitely the long needed answer - a practical framework for integrated systems in line with international standards. I am pleased to be associated with such an excellent product."*

**Hermanus Prinsloo,**  
Group Environmental  
Systems Manager,  
Anglo Platinum

*"IsoMetrix allows me to quickly and effectively evaluate the performance of all the components of the organization. It is user-friendly, delivering the information I need with no fuss."*
